INFORMED CONSENT TO CHIROPRACTIC ADJUSTMENTS AND CARE

Physicians, Chiropractors, Osteopaths and Physiotherapists are required to advise patients of benefits and risks including sprain/strain, rib fracture, disc herniation and with neck problems the following: There have been very rare incidents of injury to the vertebral artery during the course of treatment. This has caused strokes or stroke like occurrences, which are usually of a temporary nature. The chances of this happening are less than one in ten million. Tests, with or without x-rays have been performed on you to minimize these risks to yourself. Chiropractic is considered to be one of the safest and most effective forms of therapy for neck conditions. If you have any questions about this, please ask your chiropractor.

I have read the above statement and consent to treatment.
